Why this game?

Relaxed minds perform better in learning and tasks

- **Reduces stress without requiring a PhD in gaming**
- **Gives a quick mental break from academic pressure**
- **Keeps the mind engaged without overloading it**
- **Easy, fun, and playable anytime for instant refresh**

Algorithm

Start the program.

Declare variables: choice, happiness = 50, weather.

Initialize random number generator.

Display welcome message.

Repeat until user chooses Exit:

Generate random weather (0–2).

If weather = 0 → Sunny, increase happiness by 5.

If weather = 1 → Rainy, increase happiness by 7.

Else → Cloudy.

Display menu (Water, Talk, Check, Exit).

Take user input.

If choice = 1 → Increase happiness by 10.

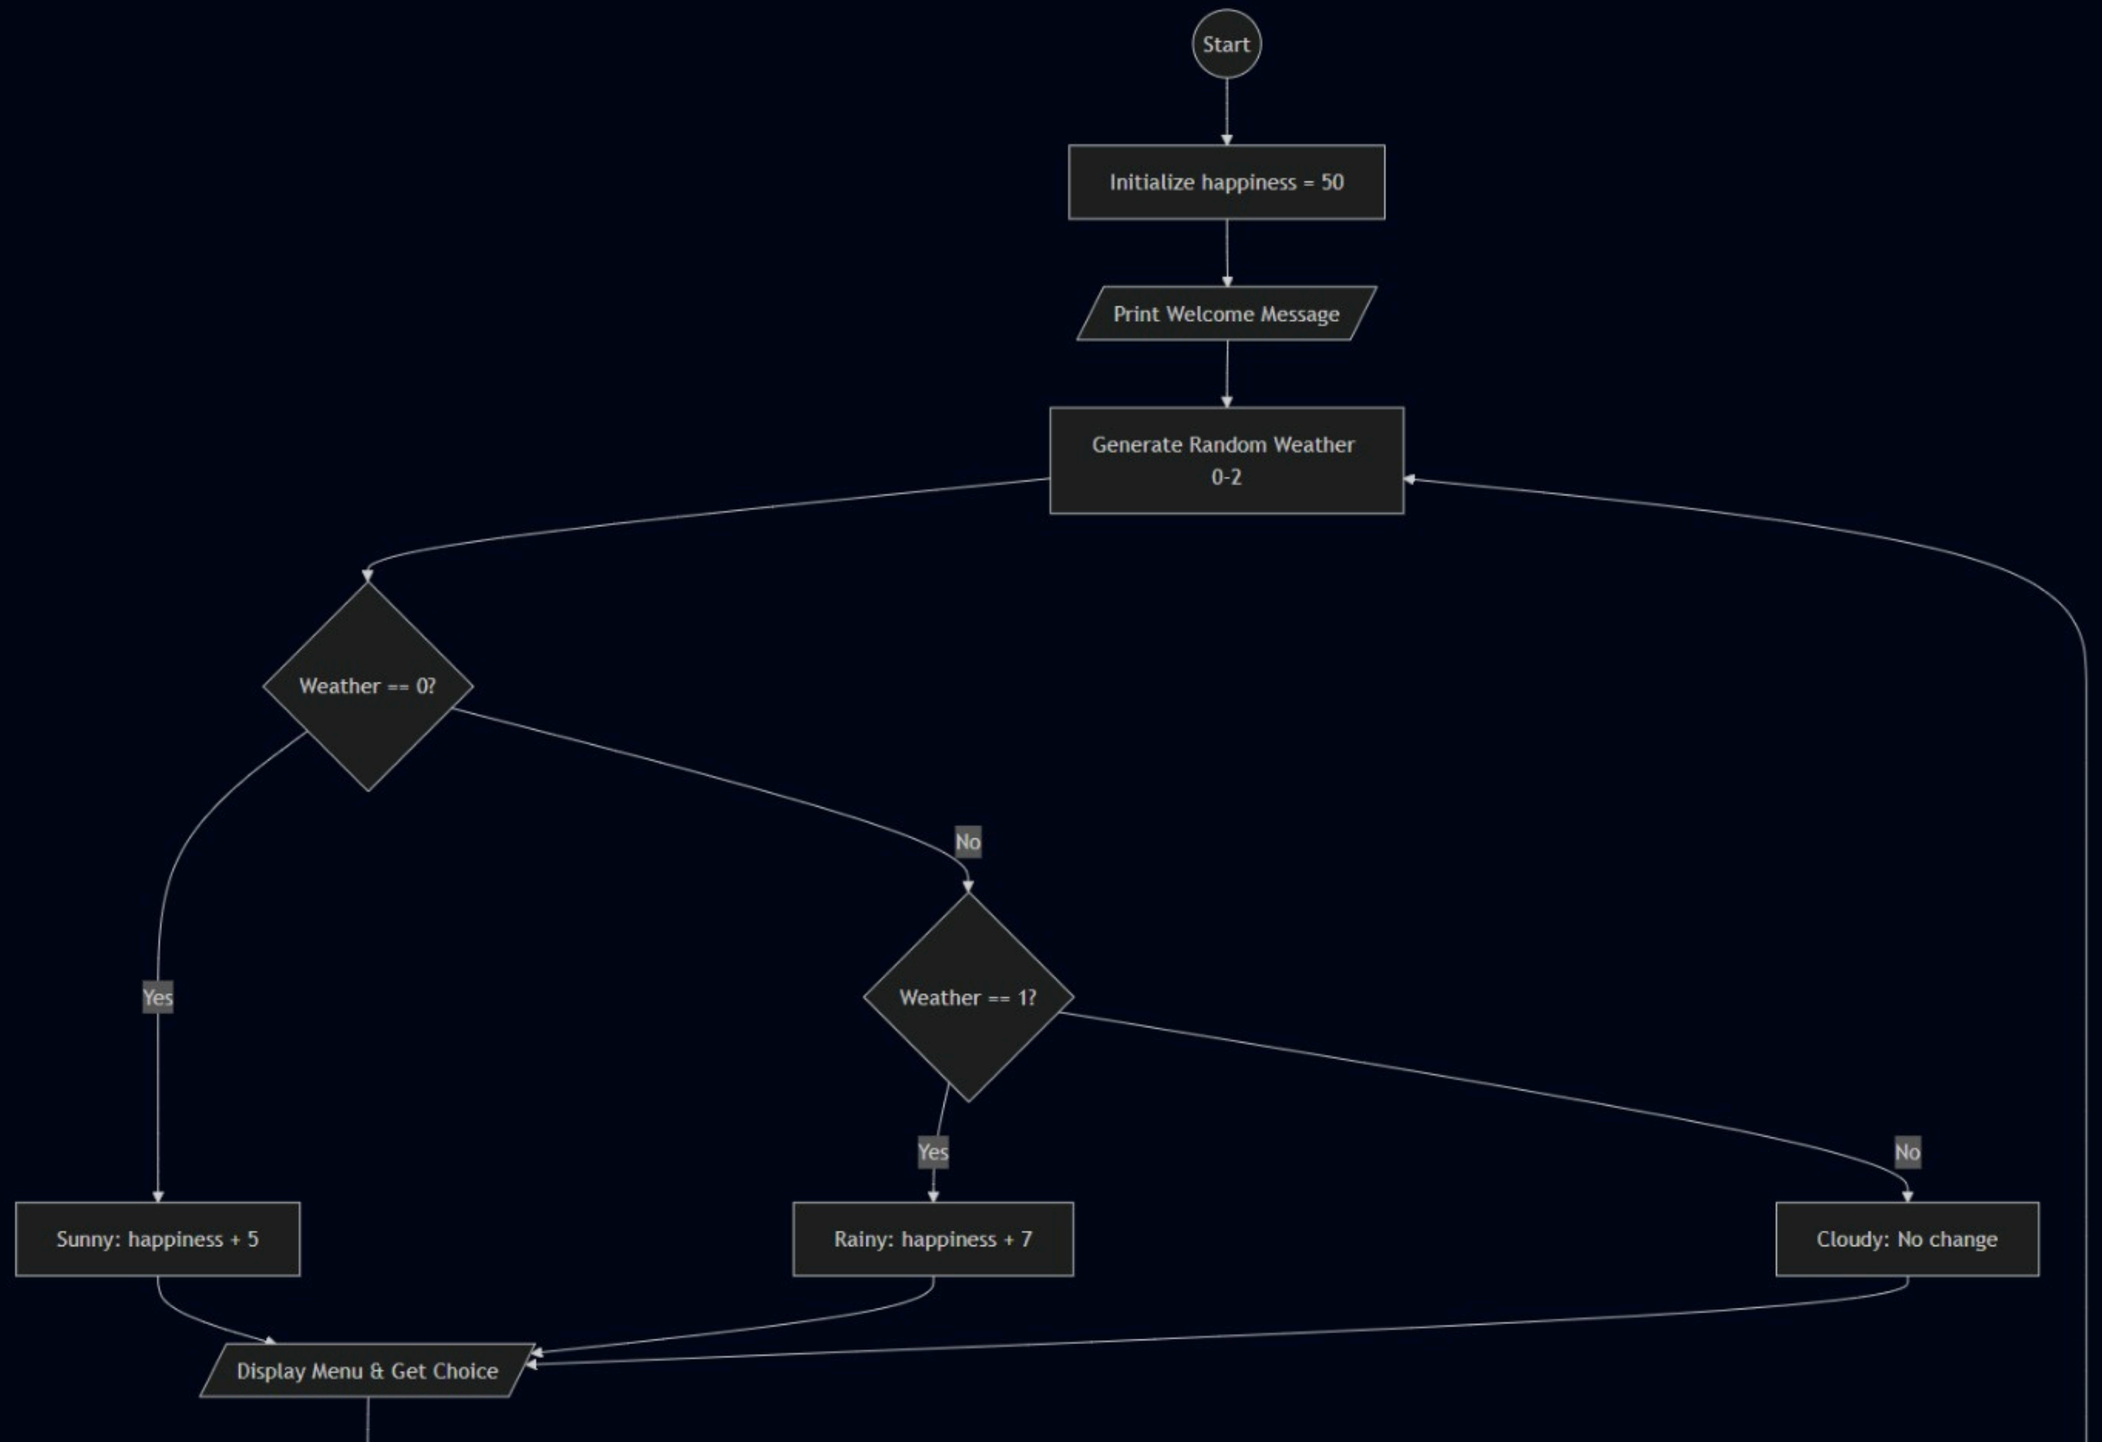
If choice = 2 → Increase happiness by 5.

If choice = 3 → Display happiness and plant status.

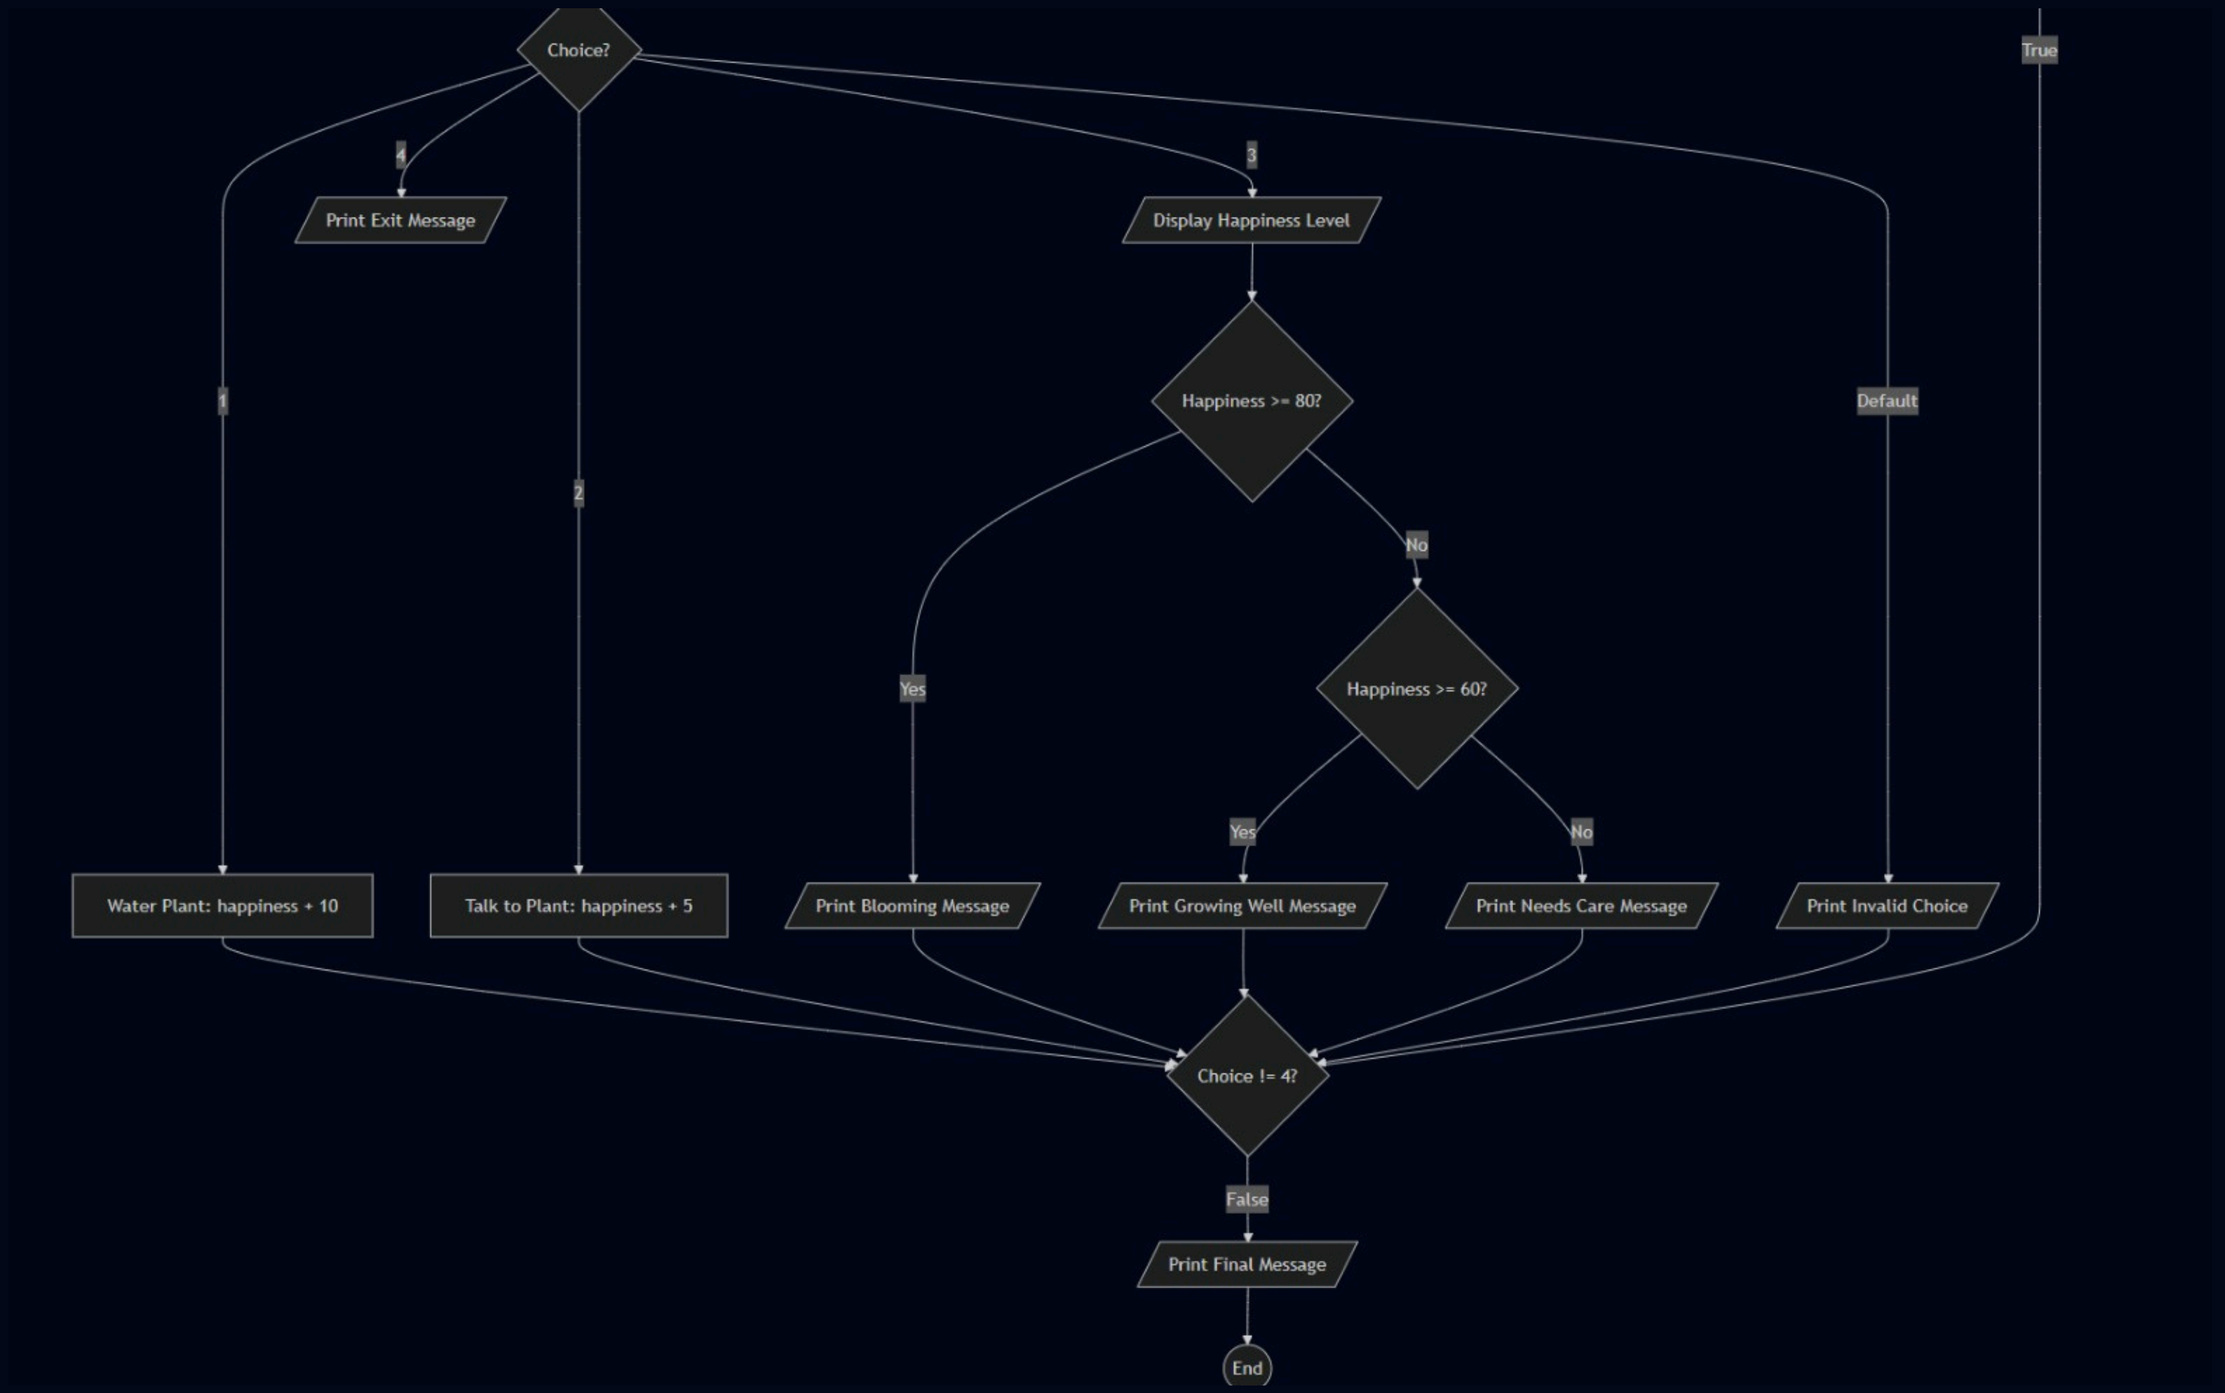
If choice = 4 → Exit loop.

Display thank you message.

End program.



Start
Initialize happiness = 50
Print Welcome Message
Generate Random Weather 0-2
Weather == 0?
Yes
No
Weather == 1?
Yes
No
Sunny: happiness + 5
Rainy: happiness + 7
Cloudy: No change
Display Menu & Get Choice



Choice?
1
2
3
4
True
Default
Print Exit Message
Display Happiness Level
Happiness >= 80?
Yes
No
Happiness >= 60?
Yes
No
Water Plant: happiness + 10
Talk to Plant: happiness + 5
Print Blooming Message
Print Growing Well Message
Print Needs Care Message
Print Invalid Choice
Choice != 4?
False
Print Final Message
End

Code

```c
#include <stdio.h>
#include <stdlib.h>
#include <time.h>

int main() {

    int choice;
    int happiness = 50;
    int weather;

    srand(time(0));   // start random number generator

    printf("🌸 Welcome to Relax & Grow Garden 🌸\n");
    printf("Take care of your plant and enjoy the weather!\n\n");

    do {

        // Generate random weather (0,1,2)
        weather = rand() % 3;

        printf("\n----- TODAY'S WEATHER -----\n");

        if(weather == 0) {
            printf("Weather: ☀️ Sunny\n");
            happiness += 5;   // plant likes sun
        }
        else if(weather == 1) {
            printf("Weather: 🌧️ Rainy\n");
            happiness += 7;   // plant likes rain more
        }
        else {
            printf("Weather: ☁️ Cloudy\n");
        printf("\n----- MENU -----\n");
        printf("1. Water the plant 💧\n");
        printf("2. Talk to the plant 🗣️\n");
        printf("3. Check plant happiness 🌿\n");
        printf("4. Exit\n");

        printf("Enter your choice: ");
        scanf("%d", &choice);

        switch(choice) {

            case 1:
                printf("You watered the plant. It feels refreshed!\n");
                happiness += 10;
                break;

            case 2:
                printf("You said kind words. The plant smiles 🌸\n");
                happiness += 5;
                break;

```

```c

        case 3:
            printf("Plant Happiness Level: %d\n", happiness);

            if(happiness >= 80) {
                printf("Your plant is blooming beautifully! 🌸\n");
            }
            else if(happiness >= 60) {
                printf("Your plant is growing well 🌿\n");
            }
            else {
                printf("Your plant needs more care 💚\n");
            }
            break;

        case 4:
            printf("Thanks for caring for your plant 🌸\n");
            break;

        default:
            printf("Invalid choice. Try again.\n");
    }

    } while(choice != 4);

    printf("\n✨ Stay calm and keep growing! ✨\n");

    return 0;
}

```

Outcome

```

3. Check plant happiness 🌿
4. Exit
Enter your choice: 1
You watered the plant. It feels refreshed!

----- TODAY'S WEATHER -----
Weather: 🌧️ Rainy

----- MENU -----
1. Water the plant 💧
2. Talk to the plant 🗣️
3. Check plant happiness 🌿
4. Exit
Enter your choice: 2
You said kind words. The plant smiles 🌸

----- TODAY'S WEATHER -----
Weather: 🌧️ Rainy

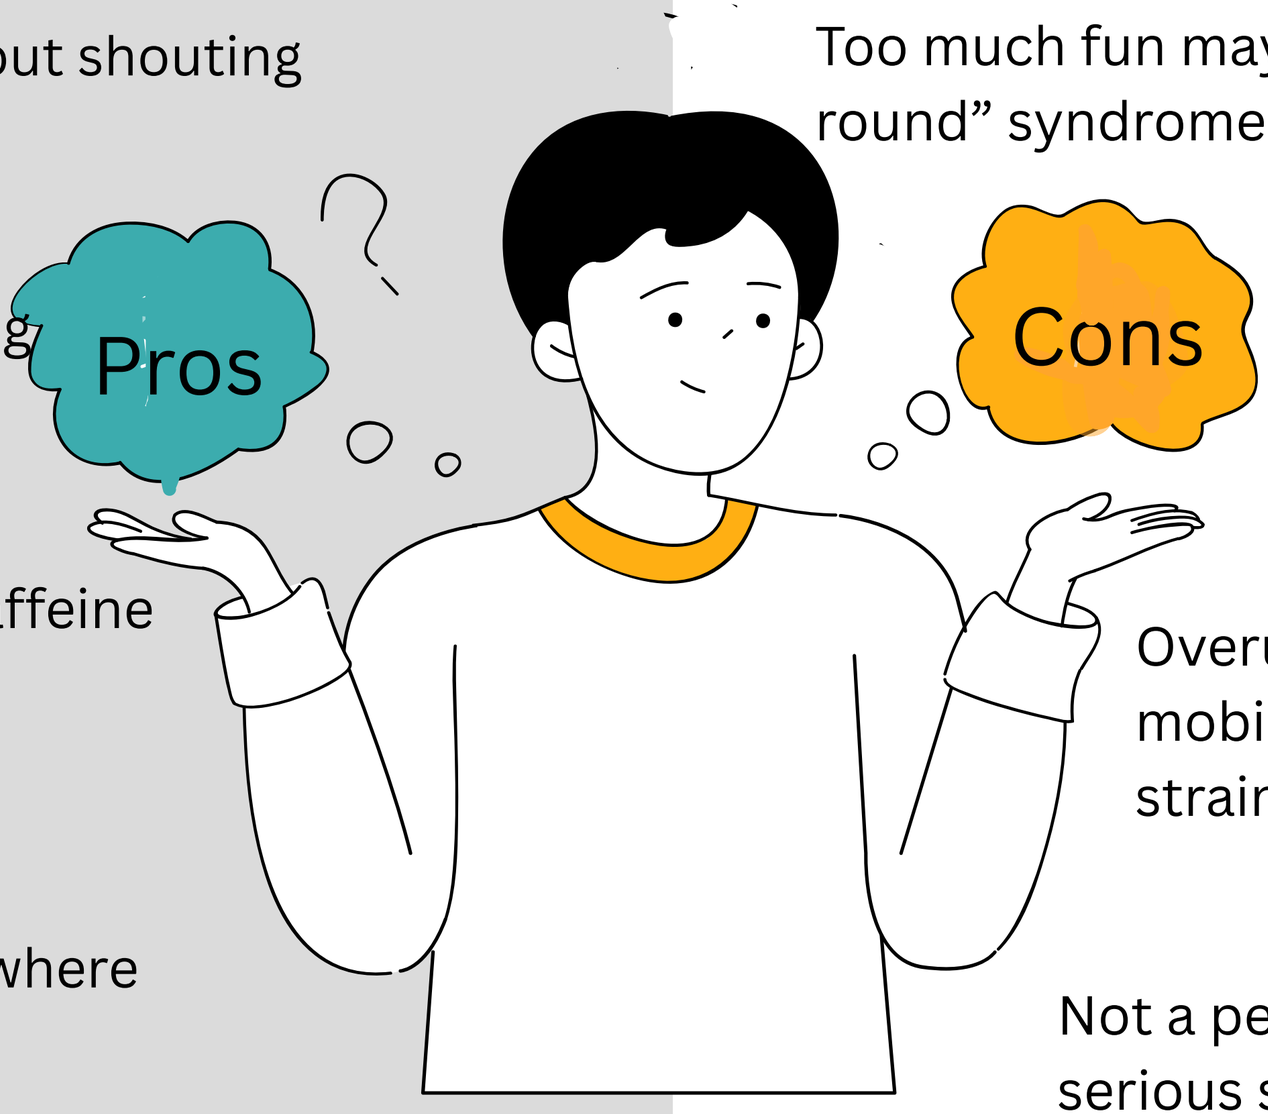
----- MENU -----
1. Water the plant 💧
2. Talk to the plant 🗣️
3. Check plant happiness 🌿
4. Exit
Enter your choice: 3
Plant Happiness Level: 86
Your plant is blooming beautifully! 🌸
```

Helps reduce stress without shouting “relax” at the user

Quick mental refresh during study or work breaks

Improves mood without caffeine or motivation speeches

Easy to play anytime, anywhere



Too much fun may lead to “one more round” syndrome

Excessive screen time increases exposure to UV/blue light

Overuse of laptops or mobiles may cause eye strain

Not a permanent solution for serious stress issues

Scope for Improvement

- Add time limits so users don’t forget real life
- Include break reminders to reduce screen overuse
- Improve visuals and sound for better relaxation
- Optimize animations and transitions for a smooth and calming user experience

Thank You

We hope you enjoyed our presentation
